CURTIN UNIVERSITY COLOMBO ACADEMIC CALENDAR

	SEMESTER 1, 2026	SEMESTER 2, 2026
Orientation - Week	09 - 13 February	13 - 17 July
Semester starts	16 February	20 July
Semester ends	12 June	13 November

* Applications close two weeks before orientation

* Application closing dates and orientation dates are subject to change and may vary depending on the course.

About Curtin

Curtin is a world-ranked, global university recognized for industry-connected programs that provide skills for agile careers.

Inspired by the motto 'Look ever forward', Curtin has thrived over the past 57 years. Established in Australia in 1967, Curtin is now a global university with campuses and locations in further five countries: Malaysia, Singapore, the United Arab Emirates, Mauritius, and Sri Lanka.

Curtin's approach to university education is driven by five core values – integrity, respect, courage, excellence and impact – and is underpinned by Curtin's dedication to building education and research partnerships that make a positive difference, both for people and the planet.

Curtin's range of courses, research strengths, learning facilities, and industry partnerships make Curtin a popular choice for students around the world. In particular, Curtin is renowned for immersive learning and simulated work environments to ensure that Curtin's students can apply professional expertise as soon as they graduate.

Top 1% in the world

Curtin ranks in the top 1% of universities worldwide, in the Academic Ranking of World Universities. (2024)

#1 for Graduate employability

In Western Australia's Public Universities (Good Universities Guide 2025)

Australia's best grads

Curtin graduates are rated the best graduate-employees in Australia for employer satisfaction, in the Government's latest survey. (QILT Employer Satisfaction Survey 2023)

#13 in Australia

(QS World Ranking 2025)

#1 in WA

Curtin outranks all public universities in Western Australia (WA) for undergraduate outcomes in full-time employment and staff qualifications. (Good Universities Guide 2025)

5 Stars Plus

Curtin continues to achieve the highest QS Stars rating possible for a tertiary institution. (QS Stars 2024)

About Curtin University Colombo

Curtin University Colombo is a global campus of Curtin University Australia, offering a world-class education in Business, Computing and Engineering, in the heart of Colombo, Sri Lanka. We provide students with flexible study options to complete their degrees in Sri Lanka or transfer to any of Curtin's global campuses in Australia, Malaysia, Singapore, Dubai, and Mauritius.

With a strong focus on academic excellence, industry connections, and state-of-the-art facilities, Curtin University Colombo prepares students for global careers through innovative programs and an inclusive, vibrant campus community.

CURTIN COLOMBO

Get a Head Start With Curtin University Colombo

Diverse Program Choices in Engineering, Computing, and Business

At Curtin University Colombo, you can choose from a variety of programs across Engineering, Computing, and Business. These diverse options ensure that you can find a program that aligns with your career aspirations and interests, backed by Curtin's globally recognized curriculum.

Graduate with a Curtin University Degree

Curtin University Colombo offers you the opportunity to graduate with a degree from Curtin University, which is ranked among the top 1% of universities worldwide, as per the Academic Ranking of World Universities (ARWU) 2024. This prestigious ranking reflects Curtin's commitment to academic excellence, innovation, and global impact, ensuring you receive a world-class education recognized worldwide.

Accredited Programs

Curtin University Colombo's degree programs are accredited by prestigious professional bodies and these accreditations ensure that your education meets the highest international standards.

- Engineering degree programs are accredited by Engineers Australia (EA)
- Computing degree programs are accredited by the Australian Computer Society (ACS)
- Business degree programs are overseen by the AACSB. Curtin University Business School is accredited by the Association to Advance Collegiate Schools of Business.

Flexible Study Options

Curtin University Colombo offers flexible study paths, allowing you to start your degree in Sri Lanka and choose to complete it locally or transfer to Curtin University in Australia or any of its global campuses in Malaysia, Singapore, Dubai, or Mauritius. Each of these campuses offers the same degree programs, giving you the freedom to tailor your study experience to your preferences and circumstances.

Note: At the time of transfer, your chosen course must be available at the desired campus.

Access to Resources

As a student at Curtin University Colombo, you gain access to Curtin University's extensive study resources and teaching support. This includes online libraries, and support services designed to enhance your learning experience and academic success.

Equal Qualification and Comprehensive Curriculum

At Curtin University Colombo, you will receive the same prestigious qualification and transcript as those studying at Curtin University in Australia or any of its global campuses. Our curriculum, Curtin-articulated programs, are designed to prepare you for the global marketplace by combining broad subject knowledge with practical application. Our programs meet high academic standards, ensuring you graduating with the skills, knowledge, and globally recognized qualifications needed to excel in a competitive job market.

Student Exchange Programs

Through the student exchange program, you can study for one semester at Curtin University in Australia or any of its global campuses offering the same program, while continuing to pay the course fees at Curtin University Colombo. This experience provides an opportunity to broaden your horizons and gain valuable international exposure.

Note: Students must meet both academic and financial eligibility criteria to participate in the exchange program.

Scholarship Opportunities

Curtin University Colombo offers a range of scholarship opportunities to make higher education more accessible. These scholarships enable you to pursue your academic goals with confidence and ease.

Seamless Transfers

Curtin University Colombo offers a seamless transfer process to Curtin University in Australia, with no additional visa processing fees. This streamlined approach simplifies the transition between campuses, making it cost-effective.

Successful Graduates

With over 2,500 successful graduates making significant contributions in their respective fields, our strong alumni network stands as a testament to the quality of education and training we provide.

Proven Academic Excellence

For over 24 years, Curtin University and SLIIT have partnered to provide high-quality education, fostering a supportive learning environment that promotes innovation and critical thinking. Through this strong collaboration, Curtin University Colombo continues to uphold these values, offering students a world-class education with opportunities for academic and professional growth.

Vibrant Student Life

Curtin University Colombo offers a vibrant student life with various sports, clubs, and societies, creating a dynamic and inclusive environment where you can develop personally and professionally while enjoying a well-rounded university experience.

Affordable Fees

Earn a globally recognized Australian degree at Curtin University Colombo, where you can complete your degree with more affordable tuition fees.

Industry Connections

Benefit from Curtin University Colombo's strong industry connections, which provide valuable opportunities for internships, networking, and employment. These connections help bridge the gap between academic learning and professional practice.

Prime Location

Curtin University Colombo is strategically located in the heart of Colombo, providing easy access to the city's amenities, and fostering a vibrant and convenient campus life.

Student Life

Clubs and societies

With a wide range of clubs and societies to choose from—including the Social Impact Club, Engineering Club, Programming Club, Entrepreneurship Club, Photography Club, Drama Club, Music Club, Dancing Club, Tamil Cultural Club, Anime Enthusiasts Club, E-Sports Club, Food Club, and Motor Sports Club—you'll find numerous opportunities for personal growth, skill development, and connecting with fellow students. These clubs offer more than just fun activities—they provide pathways to leadership, meaningful experiences, and lifelong friendships. Many clubs participate in inter-university and international competitions, giving you the chance to showcase your talents on a broader stage and gain valuable recognition. Dive in, explore your passions, and make your university experience unforgettable!

Sports

Explore a dynamic sports experience with a wide range of activities to suit every interest. Whether you thrive in team sports or excel in individual challenges, there's something for everyone. Choose from Badminton, Basketball, Carrom, Chess, Cricket, Futsal, Rugby, Table Tennis, Tennis, and Swimming. These sports not only help build teamwork, competitiveness, and personal growth but also offer the chance to challenge yourself and enjoy the sense of community as you create lasting memories!

Events

From food festivals to musical performances, cultural celebrations, and sports tournaments, you'll experience it all alongside a diverse mix of Sri Lankan and international students, creating a truly vibrant student life. This rich blend of activities and cultures ensures that every moment is filled with excitement and celebration, making your university experience dynamic, enriching, and rewarding.

Entry Requirements

Academic entry requirements

For Sri Lankan GCE Advanced Level:

Successful completion of Sri Lankan General Certificate of Education (GCE) Advanced Level with an aggregate calculated as specified in table 1 from the best 3 subjects (excluding General English) completed in one sitting. Provide separate evidence of English competency.

For United Kingdom International Advanced Level:

Successful completion of International Advanced Level (A2) from a UK examination authority (Cambridge, Edexcel or equivalent) and achieve the required aggregate as specified in table 1 (Pg. 9). Evidence of English competency must be provided.

OR

Successful completion of the Curtin University foundation program (Information Technology, Engineering, Business streams)

OR

Any other alternative qualification recognized by Curtin University.

English entry requirements

A minimum of a C grade in G.C.E. Ordinary Level English (Sri Lankan, Cambridge, or Edexcel) or G.C.E. Advanced Level General English (Sri Lankan) is required. Sri Lankan Ordinary Level and Advanced Level English results must have been issued within 5 years of the application date to Curtin University Colombo.

OR

A minimum of any one of the accepted English proficiency tests as specified in table 2 (for IELTS, TOEFL and PTE Academic, the test must have been undertaken within two years of application to study at Curtin. The test may be used for entry into the next immediate semester intake).

Students who have not met the English entry requirements based on the tests indicated above, have the option of sitting for the Cambridge Linguaskill examination administered by Curtin University, prior to course commencement and obtain the minimum required score to meet the course English entry requirement.

Notes:

1. Students applying with Advanced Level results must provide original result schedules/certificates issued by the Department of Examination or relevant authority. A conditional offer will be issued for students who are unable to provide the required documentation.
2. Students may apply with pending Advanced Level results submitting the statement of entry and must ensure they meet minimum requirement as specified in table 1 to proceed with the degree program.

Table 1: Minimum requirements for degree programs

Points are assigned on the basis that: A*/A=5, B=4, C=3, D=2, S/E=1

Study area	Specialisation	Minimum points	Course prerequisites
Engineering	Civil and Construction	8	E/S grade in Applied Mathematics or Pure Mathematics or Combined Mathematics. In the absence of either Physics or Chemistry in Advanced Level, the relevant module is to be followed in the first year of the degree program.
	Electrical and Electronic	8	
	Mechanical	8	
	Mechatronic	8	
Computing	Cyber Security	8	E/S grade in Applied Mathematics or Pure Mathematics or Combined Mathematics In the absence of Mathematics in Advanced Level, the relevant module is to be followed in the first year of the degree program.
	Software Engineering	8	
	Information Technology	5	
	Computer Systems & Networking	5	
Business	Business Administration	5	No prerequisites.

Table 2: Minimum requirements for English proficiency tests

IELTS (International English Language Test System)	
Writing and Speaking	6.0
Reading and Listening	6.0
Overall	6.5
TOEFL (Test of English as a Foreign Language) IBT (Internet Based Test)	
Reading and Listening	13
Speaking	18
Writing	21
Overall	79
PTE Academic (Pearson Test of English Academic)	
Listening and Reading	59
Speaking and Writing	59
Overall	69

Engineering

Our engineering programs combine cutting-edge technology, hands-on learning, and industry collaboration to equip you with the skills needed to excel in a rapidly evolving world. With opportunities for internships, research projects, and global exposure, we prepare you to successfully launch your engineering career.

Civil and Construction Engineering

Degree

Bachelor of Engineering (Honours) (Civil and Construction Engineering)

CRICOS CODE

072467B

Throughout this course, you will cultivate fundamental scientific, mathematical, and hands-on proficiencies. Moreover, you will grasp the art of implementing these abilities in structural analysis and design, geotechnical engineering, transportation engineering, hydraulics, construction, and professional practice. This will empower you to effectively tackle engineering challenges of the future.

In your final year, you'll integrate your design, construction, and management skills in large civil engineering projects; undertake a major civil engineering research project and select units from specialty options in the areas of structural, geotechnical, transportation, water resources and environmental engineering.

To satisfy professional requirements, you will complete the required professional engineering practice during your course. This requirement can be met through appropriate work experience or a combination of technical and nontechnical activities.

Career opportunities

Careers

- Civil Engineer
- Construction Engineer
- Site Engineer
- Structural Engineer
- Geotechnical engineer

Industries

- Construction
- Consulting
- Contracting
- Government
- Mining
- Transportation
- Water Supply

Course Outline (Duration -4 Years)

Year 1 units

- Linear Algebra and Statistics for Engineers
- Engineering Mechanics
- Engineering Foundations, Principles, Design Communication
- Introduction to Scientific Data Analysis
- Sustainability and Renewable Energy
- Calculus for Engineers
- Fundamentals of Programming
- Electrical Systems
- Resources, Processing and Materials Engineering

Year 2 units

- Civil Engineering Construction Materials
- Civil Engineering Drawing and Surveying
- Fluid Mechanics
- Structural Analysis of Determinate Structures
- Principles of Geomechanics
- Structural Analysis of Indeterminate Structures
- Structural Mechanics
- Water and Environmental Engineering

Year 3 units

- Geotechnical Engineering Analysis
- Structural Actions and Steel Design
- Transportation Engineering and Earthworks
- Civil Engineering Project and Cost Management
- Hydraulics and Hydrology
- Reinforced Concrete Design
- Specialization options

Year 4 units

- Civil Engineering Practices, Quality and Legislation
- Civil & Construction Engineering Research Project 1
- Integrated Structural Design
- Civil & Construction Engineering Research Project 2
- Design Foundations
- Integrated Design and Construction
- Specialization options

Mechanical Engineering

Degree

**Bachelor of Engineering (Honours)
(Mechanical Engineering)**

CRICOS CODE

072467B

This course is fundamentally oriented to provide learning and skills development opportunities with hands-on experience in the mechanical engineering industry.

You will learn how to apply your knowledge and skills to develop solutions to a wide range of exciting and challenging problems. In your final year you will undertake an individual design or research project and complete the required hours of professional practice. This hands-on course is designed to prepare you for employment in one of the many specialties within mechanical engineering.

Career opportunities

Careers

- Mechanical Engineer
- Mechanical Design Engineer
- Aeronautical Engineer
- Mechatronic engineer

Industries

- System Design
- Automotive
- Manufacturing
- Power Generation
- Marine Engineering
- Aerospace
- Transportation
- Mineral and Material Processing
- Water Supply

Course Outline (Duration -4 Years)

Year 1 units

- Linear Algebra and Statistics for Engineers
- Engineering Mechanics
- Engineering Foundations, Principles, Design Communication
- Introduction to Scientific Data Analysis
- Sustainability and Renewable Energy
- Calculus for Engineers
- Fundamentals of Programming
- Electrical Systems
- Resources, Processing and Materials Engineering

Year 2 units

- Computer Aided Drawing and Engineering Modelling
- Fluid Mechanics
- Fundamentals of Strength of Materials
- Machine Dynamics
- Ethics and Sustainability in Engineering
- Fundamentals of Mechanical Design
- Fundamentals of Thermodynamics
- Manufacturing Processes

Year 3 units

- Advanced Strength of Materials
- Fundamentals of Heat Transfer
- Linear Systems and Vibrations
- Applied Fluid Mechanics
- Exposure to Professional Engineering Practice
- Machine Design
- Specialization options

Year 4 units

- Electromechanical Energy Systems
- Mechanical Engineering Research Project 1
- Systems Engineering Design
- Automatic Control Systems
- Mechanical Engineering Research Project 2
- Professional Engineering Management and Practice
- Specialization options

Mechatronic Engineering

Degree

**Bachelor of Engineering (Honours)
(Mechatronic Engineering)**

CRICOS CODE

072467B

With the ever-increasing reach of auto-machine systems, mechatronic engineers are found in diverse industries including aerospace, agriculture, electrical, electronic, and energy resources.

As the number of industries that are innovating as digital technologies grow, so do the opportunities for mechatronic engineers. Rapid advances in automation applications – such as self-driving vehicles and mine-site automation – are driving an increased need for mechatronic engineers with expertise in mechanical, electronic and computer systems engineering.

Numerous industries require mechatronic engineers to work towards solutions for some of society's most pressing problems. As a mechatronic engineering student, you will develop sound theoretical knowledge in the key disciplines of mechanics, electronics, computer systems and control. You will apply this knowledge and develop practical skills through a series of projects.

Career opportunities

Careers

- Mechatronic Engineer
- Mechanical Engineer
- Automation Engineer
- Computer Systems Engineer
- Data Scientist

Industries

- Aerospace
- AgriTech
- Autonomous Vehicle
- Manufacturing
- Robotics
- Energy Resources
- Biosensors and Security
- Biotechnology and Biomechanics

Course Outline (Duration -4 Years)

Year 1 units

- Linear Algebra and Statistics for Engineers
- Engineering Mechanics
- Engineering Foundations, Principles, Design Communication
- Introduction to Scientific Data Analysis
- Sustainability and Renewable Energy
- Calculus for Engineers
- Fundamentals of Programming
- Electrical Systems
- Resources, Processing and Materials Engineering

Year 2 units

- Microcontroller Project
- Machine Dynamics
- Electrical Circuits
- Foundations of Digital Design
- Data Structures and Algorithms
- Ethics and Sustainability in Engineering
- Mechatronics Design Project
- Signals and Systems

Year 3 units

- Robot Manipulation Project
- Computer Aided Drawing and Engineering Modelling
- Intelligent Agent
- Embedded Systems Engineering
- Exposure to Professional Engineering Practice
- Introduction to Autonomous Robots
- Specialization options

Year 4 units

- Machine Learning
- Dynamic Modelling and Control
- Mechatronic Engineering Research Project 1
- Mechatronic Engineering Research Project 2A
- Mechatronics Automation Project
- Professional Engineering Management and Practice
- Specialization options

Electrical and Electronic Engineering

Degree

Bachelor of Engineering (Honours) (Electrical and Electronic Engineering)

CRICOS CODE

072467B

Advances in electronic communication, the Internet of Things (IoT) and renewable energy are increasing the diversity of career opportunities in electrical and computer engineering. Throughout this course, you will gain a thorough understanding of the concepts that underpin electrical and computer engineering. You'll then choose to specialise in one of three areas: Electronics and Communications, Power Systems or Embedded Systems.

In your final year, you'll complete a major research or design project and 12 weeks of professional practice.

Career opportunities

Careers

- Electrical Engineer
- Electrical Power Engineer
- Electronics Engineer
- Communications Engineer
- Embedded systems Engineer
- Network Controller
- Power Systems Engineer
- Systems Engineer

Industries

- Application Engineering
- Computer Hardware Design
- Electronic Systems
- Fibre Optics
- Mobile Communications
- Manufacturing and Robotics
- Software Development
- Solar and Renewable Energy

Course Outline (Duration -4 Years)

Year 1 units

- Linear Algebra and Statistics for Engineers
- Engineering Mechanics
- Engineering Foundations, Principles, Design Communication
- Introduction to Scientific Data Analysis
- Sustainability and Renewable Energy
- Calculus for Engineers
- Fundamentals of Programming
- Electrical Systems
- Resources, Processing and Materials Engineering

Year 2 units

- Electrical Circuits
- Calculus 2
- Foundations of Digital Design
- Electronic Fundamentals
- Signals and Systems
- Microcomputers
- Engineering Management and Professional Practice
- Electrical Machines

Year 3 units

- Dynamic Modelling and Control
- Power Grid Infrastructure and Protection Systems
- Power Electronics
- Renewable Energy Principles
- Power System Analysis
- Communications Engineering
- Specialization options

Year 4 units

- Industrial Automated Systems
- Engineering Research Project 1
- Integrated Design Project
- CPU and GPU Architectures
- Engineering Research Project 2
- Electrical Machines Drives & Controls
- Specialization options

Apply for merit scholarships

Merit based scholarships at Curtin University Colombo offer financial, academic and career support, giving you more opportunities to gain new skills, expand your horizons and add to your portfolio of achievements. The scholarship has different eligibility criteria, application procedures and closing dates, so check these early.

Further information regarding Curtin University Colombo merit based scholarships can be obtained by contacting the admissions team.

“Curtin University’s Mechatronics Engineering degree offers a comprehensive understanding of key areas in the ever-changing field of technology and industry. This program hones my technical expertise while encouraging critical thinking and creativity, essential for problem-solving in real-world scenarios. With this strong foundation, I am poised to thrive in the dynamic field of Mechatronics, ready to tackle complex challenges and drive technological advancements.”

Anusara Abeygoonawardane

Engineering Pavilion - Curtin University

Engineering Foundation Year(EFY) in Sri Lanka and transfer to Curtin to explore more engineering study option

Explore a diverse range of engineering study options at Curtin Perth, in addition to those offered at Curtin University Colombo. The Perth campus provides opportunities in various engineering disciplines, allowing you to tailor your education to your specific interests and career goals.

The Engineering Foundation Year (EFY) serves as a common foundation for all engineering disciplines, providing students at Curtin University Colombo with a flexible pathway. This flexibility enables transferring students to Curtin Perth the opportunity to explore a broader spectrum of study options, such as mining engineering and chemical engineering. Embrace the possibilities and pave your way to a diverse and rewarding engineering education.

Additional Bachelor of Engineering majors at Curtin University, Perth

Mining Engineering:

This major emphasizes the use of advanced technologies to safely and efficiently extract minerals. You'll explore innovative mining techniques, gain insights into mining economics, and consider the impact on Indigenous cultures, all while contributing to sustainable development.

Energy Engineering:

This innovative major addresses the demand for roles in energy efficiency, renewable energy technologies, fossil-fuel reduction, hydrogen systems, geo-energy options, and environmental compliance. It provides comprehensive knowledge to conceive, design, build, and operate engineering processes aligned with a clean energy future, emphasizing environmental and social responsibility.

Chemical Engineering:

Chemical engineering involves optimizing the sequence of chemical and physical processes, along with operating conditions, to transform raw materials into higher-value products. It covers the development, design, and management of processes and equipment for material extraction, conversion, and upgrading in various process industries.

Industrial and Systems Engineering:

Industrial and systems engineers design, install, and enhance systems integrating people, materials, equipment, energy, information, and finance. They use engineering management techniques to ensure quality, safety, environmental sustainability, and human needs are met, evaluating, and predicting outcomes of change.

Metallurgical Engineering:

Metallurgical engineers work on converting raw metals and minerals into usable formats. This major teaches the design, development, optimization, and management of metallurgical processing plants, transforming low-value raw materials into high-value mineral and metal products in an economical and environmentally responsible manner.

Software Systems Engineering:

Software engineers create computer-based systems, from mobile apps to electric vehicles, shaping everyday life and diverse industries. This course teaches software development through principles of design, measurement, analysis, and emerging technologies. Gain a solid foundation in computer science and electrical engineering, emphasizing software requirements, design, implementation, industrial and embedded systems, and testing.

How to Apply for EFY Transfer Pathway:

- Complete the Engineering Foundation Year (EFY) at Curtin University Colombo
- Choose your desired engineering major to study at Curtin University in Australia
- After completing your first semester, contact the Global Transfer Unit at Curtin University Colombo for the application process

Computing

A photograph of a diverse group of students in a modern computing classroom. In the foreground, a young woman with long dark hair and a braided headband is focused on her laptop. Behind her, a young man with headphones around his neck is also working. Further back, another student is visible, and a woman in a white lab coat stands in the background, possibly a teacher or lab assistant. The desks are yellow, and the atmosphere is one of active learning and collaboration.

We offer a world-class computing education that blends advanced technology, practical experience, and industry partnerships to equip you with the skills needed to thrive in today's fast-paced digital landscape. With opportunities for internships, innovative research projects, and international exposure, we prepare you to successfully embark on your computing career.

Software Engineering

Degree

**Bachelor of Computing
(Software Engineering)**

CRICOS CODE

0100817

Designed to prepare you for a career in computing, this program will equip you with high level knowledge of computer processes and systems involved in software development. Aspects of modern computing, fundamental programming and theoretical knowledge is embedded into the teachings of the degree, followed by specialisation in software engineering.

In this major you will learn to design, measure, and analyse software-based systems. You'll receive a strong foundation in computer science with emphasis on the gathering, design, implementation, and testing of software requirements. You will also advance your communication and collaboration skills, how to apply your knowledge and skills to invent or develop solutions to a wide range of exciting and challenging problems in industry.

Career opportunities

Careers

- Software Engineer
- Business Analyst
- Full Stack Developer
- UX Engineer
- Software Architect
- Project Manager
- IOS/Android Developer
- Software Quality Assurance Engineer

Industries

- Software Development
- Game Design and Development
- Cyber Security
- IT Analysis
- Finance and Banking
- Telecommunications
- Government
- Automotive

Course Outline (Duration -3 Years)

Year 1 units

- Fundamental Concepts of Data Security
- Integrating Indigenous Science and STEM
- Introduction to Software Engineering
- Programming Design & Implementation
- Data Structures & Algorithms
- Unix & C Programming
- Linear Algebra
- Requirements Engineering

Year 2 units

- Computer Communication
- Software Engineering Testing
- Object Oriented Software Engineering
- Operating Systems
- Distributed Computing
- Mobile Application Development
- Cyber Crime & Security Enhanced Programming
- Database Systems

Year 3 units

- Human Computer Interaction
- Capstone Computing Project - Part 1
- Capstone Computing Project - Part 2
- Design & Analysis of Algorithms
- Software Engineering Concepts
- Elective units

Cyber Security

Degree

Bachelor of Computing (Cyber Security)

CRICOS CODE

0100817

This course focuses on the key concepts and challenges in data protection and computer software security. You will examine both the high - and low - level practical aspects of computer security. High-level aspects include cryptography theory, data access policy development and security program management. Low - level aspects include computer forensics, network intrusion detection and incident handling.

You will also study theory behind new developments in computing, such as Machine Learning & incident handling in network defence.

Graduates will have the skills to identify and implement appropriate applications for specific scenarios, as well as an understanding of issues related to the protection of individual rights.

Career opportunities

Careers

- Security Analyst
- Security Engineer
- Security Investigator
- Network Security Engineer
- Information Assurance Engineer
- Cryptographer
- Security Administrator

Industries

- Applications and Software Development
- E-commerce
- Healthcare
- Finance
- Manufacturing
- Education
- Government

Course Outline (Duration - 3 Years)

- Fundamental Concepts of Data Security
- Integrating Indigenous Science and STEM
- Introduction to Software Engineering
- Programming Design & Implementation
- Data Structures & Algorithms
- Unix & C Programming
- Linear Algebra & Statistics for Engineers
- Cyber Security Concepts

Year 2 units

- Data Communications & Network Management
- Cloud Computing
- Operating Systems
- Unix Systems Programming
- Database Systems
- Cyber Crimes & Security Enhanced Programming
- Computing Topics
- Elective units

Year 3 units

- Fundamental Concepts of Cryptography
- Machine Learning
- Capstone Cyber Security Project - Part 1
- Capstone Cyber Security Project - Part 2
- Cyber Security Intrusion Detection System & Incident Handling
- Penetrating Testing & Defence
- Elective units

Information Technology

Degree

Bachelor of Information Technology

CRICOS CODE

0100818

This course will provide you with the skills and knowledge you need for a successful career in the rapidly evolving information and communications technology industry. It provides coverage of aspects of modern computing and computer networks. It covers fundamental programming and security knowledge as well as specializing in network programming and other aspects of distributed computing.

The course covers a wide range of knowledge areas in ICT, enabling students to find employment in a wider spectrum in the ICT industry or Academia.

Career opportunities

Careers

- Application Engineer
- Software Engineer
- Software Quality Assurance Engineer
- Web Developer
- IT Educationist
- Development Operations Engineer (DevOps)
- Systems & Database Administrator

Gain broad career options and wide-ranging expertise in marketing, finance, project management, human resources, and strategic management. With opportunities for internships, real-world projects, and international exposure, we prepare you to successfully launch your business career.

Business Administration

Degree

Bachelor of Business Administration

CRICOS CODE

018007A

The Bachelor of Business Administration is an international qualification that develops broad business knowledge, ensuring you are a highly adaptive graduate ready to pivot to the needs of industry. You'll be cross-skilled in various areas of business, ready to work in a dynamic environment.

An elite global university

The Bachelor of Business Administration (BBA) degree at Curtin University Colombo is offered through Curtin Business School, which is accredited by the prestigious AACSB (Association to Advance Collegiate Schools of Business) and holds a 4 Palms of Excellence rating from Eduniversal. Curtin is also a signatory of the UN Principles for Responsible Management Education (PRME), reinforcing its commitment to sustainability and ethical leadership.

AACSB accreditation is a mark of distinction, awarded to business schools that meet rigorous standards of academic and professional excellence. It is recognized globally as the longest-standing and most prestigious form of accreditation a business school and its programs can achieve.

Three business specialisations to broaden your horizons

In addition to the core units, you will study three specialisations during the course. The specialisation includes International Management, Digital Marketing and Innovation and Entrepreneurship. These give the freedom to personalise your degree, and enhance your career choices and marketability in the international business arena.

Study our foundation units

In the first year of the Business degree program, you will explore core competencies in business, learn to use financial information to make informed and responsible decisions, and develop your business intelligence and analytical capabilities to interpret data in a meaningful way. You will complete management foundation units aligned to global trends, and develop skills across marketing, finance, human resources, project management and strategic management. You will graduate to meet the challenges such as,

- Financial Decision Making
- Markets and Legal Framework
- Communication, Culture and Indigenous Perspectives in Business
- Strategic Career Design
- Analytics for Decision Making
- Introduction to Business Information Systems
- Organisational Behaviour
- Discovering Marketing
- Introduction to Finance Principles
- Project Management
- Human Resource Management

International Management Specialisation

This specialisation prepares students for global careers by focusing on managing international operations in cross-cultural and cross-national environments, particularly in emerging markets. Students learn to analyze the impact of both global and local environments on management, organizations, and leadership.

Social Media and Digital Marketing Specialisation

Digital Marketing specialisation opens the door to digital marketing and how it applies across the dynamic world of business and beyond. You can choose to study topics including how to manage retail and e-commerce businesses, create digital marketing strategies, and manage social media platforms.

Innovation and Entrepreneurship Specialisation

This specialisation is designed for enterprising people who want to become entrepreneurs as founders of fast-growing businesses or work as internal corporate entrepreneurs for innovative organisations. You'll gain skills in problem solving, planning, organising, and managing innovation and develop your skills, knowledge, and expertise in starting, running, and growing an entrepreneurial venture. This specialisation provides breadth in innovation, entrepreneurship, creativity, design thinking and prototyping for innovative individuals or those wishing to work as internal corporate entrepreneurs.
